

ARE YOUR PATIENTS HAPPY WITH THEIR CARE?

Many patients prefer the convenience of getting medical products directly from their physician during an office visit. When asked to make a separate stop, many patients never purchase the recommended product. Physicians who dispense high quality products in-office have the opportunity to select the best product and explain proper use to ensure faster recovery.

IN-OFFICE DISPENSING PROMOTES

- Convenience for patient
- Closer monitoring of patient care
- Increased revenue opportunities
